

# NEORIS & MICROSOFT

## Accelerating your Digital Transformation in a sustainable manner

### NEORIS' Cloud services

How can you accelerate Digital Transformation while ensuring innovation is permanent and effective?

NEORIS has a robust set of Cloud services to transform enterprises into more agile and intelligent organizations. Leveraging Microsoft's powerful Azure platform, we strive to provide a seamless integration of your business with everything the Cloud has to offer.

# Microsoft

### NEORIS SERVICES

---

## Move to the Cloud

Current business demands agility and at the same time secure and efficient computing power. Microsoft Azure handles this need, allowing your organization to focus completely on innovating on your competitive advantage capabilities, increasing your chances to succeed in the digital era. At NEORIS, we specialize on the following cloud migration workloads:

- Data Center infrastructure migration
- Application modernization and migration
- SAP migrations
- Windows & SQL Server Migration
- Digital Integration & API's

## Advanced Analytics and AI

An intelligent enterprise uses all the data available to improve the way decisions are made. Our use of Azure infrastructure provides the storage and services required to use data in an intelligent way, allowing you to detect patterns and predict market events ahead of your competition. Here we focus on two key areas:

- Migration of analytical platform to the cloud
- Implementation and development of AI models in the cloud

## Hyperautomation

Digital Transformation is built on top of an efficient set of automated business processes and standard applications. This reduces human error and frees your talent to focus on more long-run objectives and tasks. In this area, we offer services in:

- Robotics Process Automation with Power Automate
- Low Code / No Code enablement and development with Power Platform
- Productivity

## Success Cases

### A Cement company's SAP Migration to Azure.

A multinational building materials company and one of the largest in Latin America had been working deeply on their Digital Transformation. Optimizing their Operational Backbone based on SAP applications has been key to enabling innovation and process integration.

## Digitalization of a National Retailer – SAP F&R and BW on HANA on Azure

To compete with other industry giants, a Mexican national retailer has embarked on the journey towards digital transformation. They partnered with NEORIS to help them stay competitive through innovation and the efficient use of technology. One of the most important challenges that they needed to solve was to deliver on the promise of gaining agility and resilience of their operations, something they achieved by migrating their Forecast and Replenishment SAP Module, as well as BW on HANA to Azure.

## Industries we specialize in:

### Manufacturing

For Manufacturing companies, we focus on digital transformation through supply chain and production optimization, leveraging digital manufacturing to help modernize business processes and provide transaction visibility while reducing human intervention.

### Retail / CPG

Due to the pandemic, we've worked intensely with Retailers to prioritize digital sales channels and experience. With CPG companies, we primarily focus develop on very advanced Direct to Consumer programs, both centered on a Customer-Centric approach and insights and digital technologies.

### Financial Services

The digitization of customer interactions leveraging AI has been a strong trend in Financial Services institutions, looking to improve the customer experience through digital channels in a hyper personalized way, providing customer insights and cross selling opportunities through digital services.

## Telco & Media

The current competitive landscape where customers have more options and are less loyal than ever has led us to focus on developing business value for Telcos through data and model driven approaches retaining, and attracting new customers with personalized and value-added innovative services.

## Higher Education

Higher education institutions are increasing enrollment and reducing student desertion with the use of digital technologies and a data and model driven approach, while at the same time reinventing the teaching experience to the new normal through the use of cutting-edge technology.

## Healthcare

The pandemic has forced us to revolutionize the concept of traditional medicine and health services. By using digital technologies and a data and AI approach, hospitals and insurance companies introduce innovative and differentiated services as a way to cope with the added challenge of providing quality service during a global pandemic.

"The cloud solution is very good and allows us to continue growing at the same rate as the business requires and this allows us to be ready at any time to grow"

Javier Reyes, IT Manager JBS – COMBO

"The system works much faster than our previous one. To download reports of over 20 thousand lines (FBL3N) or simply to do a balance comprobation (F.01), I've noticed a significant reduction in time"

Pablo A. Martin P.
